
Step 1: Task setup & isolation
SILO-BENCH: 6 classes × 5 seeds
Private task shard A
Private task shard B
9 2 7
1 5 3
Agent A
No direct messages
Agent B
Step 2: Storage-mediated collaboration
One carrier per run
M1 File content
Payload in file bodies
M2 Directory names
Base32 names, empty dirs
M3 Cache-key existence
1 0 1 Key present / absent
A
B
Step 3: Measurement & offline audit
Content-only
File bodies + basic ops
Extended
Content + names + key states
+ access associations
Storage events
Covert or clean?
Monitor W
Step 4: Metric computation
Exp A Task success
Correct final answer (LLM)
Exp B Capacity
bits/s, bits/round
Exp C Persistence
TTL, activity, cleanup
Exp D Audit
TPR / FPR
Capacity & persistence: programmatic tests, no LLM
Negative control
A
S_A
S_B
B
